CIA Position

# Considerations $\Rightarrow$ TT II - Report

Issues  $\Rightarrow$  What do we do - ?

System for Targetting, I dent & Control

SR - no control for subordination of orgs & installations. Very important to CIA analysts (Same as ~~TT II (BM)~~)

- Strictly targeting would overload - for light use -
- Security - all-source - no provision for passing ST-TTII info for identification
- Code Utilization - how often updating - who will decide what install is identified
- Name element - variations show up in analysis -
- 

Options = All-source - collection tie-in -

Elint  $\Rightarrow$  Photo

IR-El-Photo -

IRR-IR-EL-Photo

- Country Code - etc -

Note - DIA Wednesday

[REDACTED] - 1-2-3 - too much technical data  
i.e. numbers, confuse cables from field

**TRP** - Stable central base for input of Intel for  
attache reporting. Also - exchange of data  
files in base - receiving field reports not  
formatable from.

**DSS** -

**OBI(NIS)** - BE No - burden on contributors -  
little on publishers -  
Where would burden fall = ? - About even - CIA - DIA.  
How to handle -  
Separate sections & p.ye? -

25X1A **Dickett** - [REDACTED] - FUMSAC - much beyond absolute  
minimum - get more trouble than worth  
it -

**COMOR Task Files** - NPIG = BE system - No problem

**FIB** - - No big problem -

? **Mark** - Standardize

CHILE people check |!  
SR | 2-3 p.ye  
NPIC | no principles  
| no problems  
| freedom - problems

Approved For Release 2002/01/03 : CIA-RDP80B01139A000500010003-5

Warren:

Letter of Transmission.

Suggest that we junk the Para 8 in the original letter and  
renumber, but use, the present Para 9.

Approved For Release 2002/01/03 : CIA-RDP80B01139A000500010003-5
